To Whom It May Concern:

It is my pleasure to recommend to you an esteemed business US Building Consultants, Inc.. In my capacity as Vice President of Construction at Exclusive Resorts I have worked with USBC, Inc. for the past several months on a water infiltration problem at our properties on the western coast of Florida.

USBC, Inc. was tasked to find the source of water infiltration in (6) of our properties and to provide a solution to prevent further damages. In this process they worked closely with Exclusive Resorts' onsite contractor. USBC, Inc. remained open to alternative solutions, but never compromised their position on providing the best long term resolution.

The staff at USBC, Inc. always operated in a timely, professional, and courteous manner; once problems were identified they provided necessary documentation (architectural details and products) to support their findings. They tested all the onsite contractors' and certified that the problem had been corrected.

I would without any reservation strongly recommend USBC, Inc. to anyone attempting to solve water infiltration issues. In fact, Exclusive Resorts would utilize them again if problems like this should occur, or in the pre-construction review to identify and possibly avoid potential problems.

If you have any questions, please don't hesitate to contact me directly.

Sincerely,

Michael Rable
Vice President, Construction
Exclusive Resorts, LLC
