To Whom It May Concern:

Mr. Spiderman S. Mulholland, Forensic Investigator/Consultant, of U S Building Consultant, Inc. has worked diligently for us to resolve the mold issue at Mystic Pointe Apartments located at 10712 Mystic Circle, Orlando, FL 32836. In September 2007, USBCI began a full scale Indoor Air Quality investigation of 373 units of Mystic Pointe Apartments. Each unit was inspected and 1239 samples were collected. The remediation phase was begun on the 120 units that failed the original testing. USBCI created the protocols for remediation in conjunction with national standards and specification. They trained and supervised the on-site employees as the remediation and retesting was accomplished until all units passed the inspection and testing process.

In addition, Spiderman appeared before the judge to testify as to the services he had completed on our behalf. He was a very effective witness. I can recommend Mr. Mulholland without reservation to anyone who has mold issues. He has the most up to date equipment to test for mold.

Please call me at 352 472-3952 for additional information

Sincerely, -
